5. Customers places request for material requirements.
6. Supplier can view all the requests who sent for requirements.
7. Supplier can review the requests and based on the feasibility /availability of goods he can agree for the request.

8. Supplier confirms the request after finalizing the price with customer.
9. Payment will be done to Supplier from the customer through the APP , which can be done through Payment Gateway.
10. Supplier can also book Truck or Bulk trucks according to his requirement.
11. Supplier can search for Trucks based on location based on Truck Types and Based on Transporter.
12. After confirmation from the Transporter for carrying his Goods, Supplier pays the price after price negotiation with Transporter through Our APP .
13. Supplier can Track(GPS) for his bookings made.

SUPPLIER DASH BOARD CONTAINS THE FOLLOWING:

- **MATERIAL REQUESTS FOR YOU**
- **MY ORDERS**
- **FIND TRUCKS**
- **STOCK**
- **TRANSACTIONS**
- **REPORTS**

MATERIAL REQUESTS FOR YOU:

In this option Supplier can view the No. of requests from different parties i.eGen.customer, Transporter, Companies(factories, Industries).

If supplier goes in detail, he can view all the requests from different parties which goods they request and location as well. He can view the Bulk quantity requests from Transporter or Companies.

Supplier reviews the requests and negotiate the price then confirms the request.

Supplier can filter in this based on quantity from different parties.

Payment will be done through APP.

Receipt will be generated Supplier can down load it.

MY ORDERS:

In this Supplier can view the orders booked.

Trip progress.

Delivery status

Past Trips/Current Trips.

GPS Tracking.

FIND TRUCKS

In this option Supplier will find trucks for his business requirement.

As supplier gets bulk orders from different parties. He needs Trucks to booked.

Supplier searches for Trucks with type of Tonnage Capacity of Trucks.

Supplier looks for Transporter who provides trucks for his required location.

Once Price confirmation with the party finalized then payment will be done through our App Payment Gateway option.

STOCK

Supplier can maintain Inventory in this option.

Supplier maintains different materials according to that he can add availability of goods in quantity will be maintained.

Based on the booking quantities of the materials, stock will be automatically updated.

Supplier can view the stock based on booked for parties.

TRANSACTIONS

Supplier can view the transactions generated for his bookings.

Supplier can view the transactions generated filtered on date.

Supplier Can view the transactions amount for the bookings.

REPORTS

Supplier can view different Reports.

Supplier can view daily, weekly, monthly etc. stock reports.

Supplier can view stocks supplied to different parties.

COMPANIES (Factories & Industries)

Generally, these big companies will have Tender policy with the Transporters & Suppliers for their business requirements. These companies can utilize this Application to book the Trucks or Goods in Bulk. They will place a current order with Transporter or Supplier for their requirement. They can place Pre-order with the Transporter or Supplier for no. of Trucks and Quantities for future expected.

If Company needs, say for e.g. Next month they require 10000Mts should be supplied. Then they can use this application for future booking for trucks & Goods. E-Agreement copy (or) Order copy will be made between both the parties and E-copy will be generated.

Regarding Payment: As companies require Trucks & Goods in bulk, payment mode will be like

- ✓ Advance payment mode
- ✓ After delivery of Said Quantity mode.
- ✓ Remaining payment will be done after L. R's submission to the Companies.

Based on their mutual agreement the payment option will be fixed for both the parties.

If Transporter or Supplier fails to provide the said trucks or goods in the date required by the company. Then penalty policy will be taken care by company. Trucker APP is nowhere concerned with the policies of penalty policies of the companies, Transporter, Supplier. Based on their mutual concern only, app will work to book trucks or goods.

Company (factories & Industries) has to register in the Application in order to proceed for bookings.

Company will login to the App and searches for the Availability of Trucks and Goods(material)

Company reviews the results and proceeds for booking.

Admin Panel will be provided to the company in the App. So that they can monitor.

*All the activities related to Bookings, Orders., Payments, LRS Submission, Policies. Tracking
Tracking of the vehicles GPS will be provided to view the truck location.*

Reports will be provided categorized by party, date, location,material etc.,

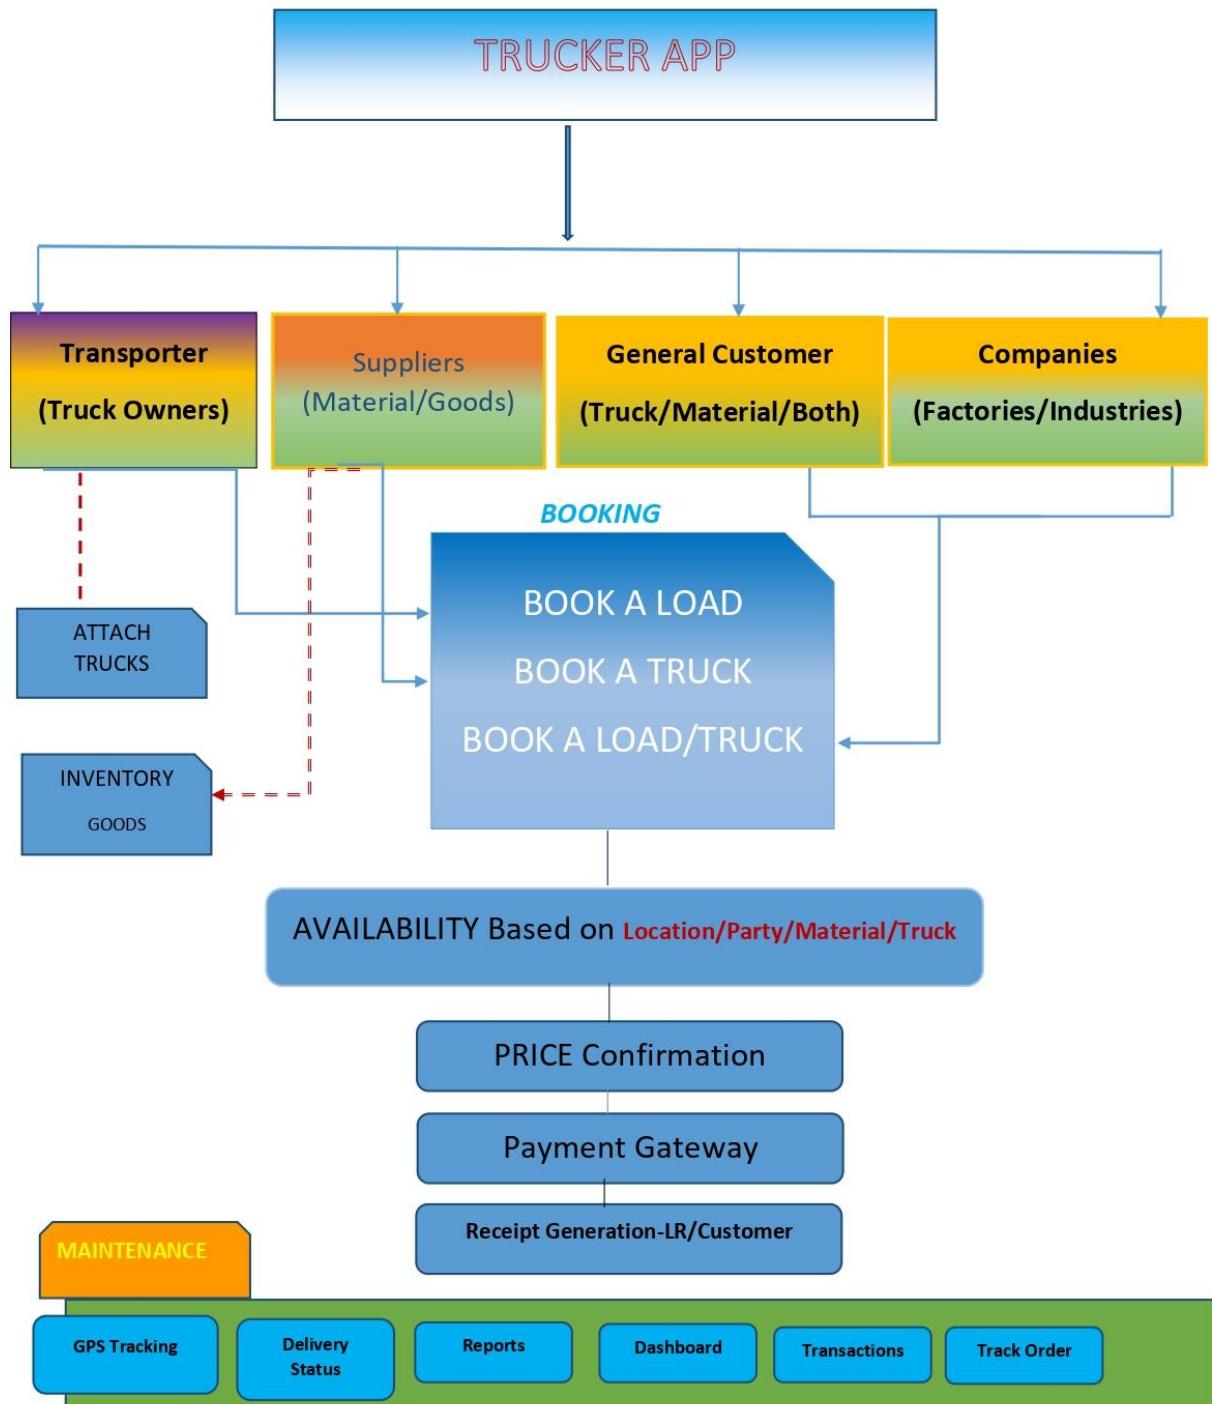

PROCESS / FUNCTIONAL FLOW

TRANSPORTER BOOKING SCREENS

Transporter(**Truck Owner**) posts his requirement in the following screen.

Generally Transporter(Truck owner) gets requests from different suppliers or from General customers for their business requirement . So Transporter views the requests and based on that he will send his trucks to the concern party on the booking.

Apart from that if Transporter wants to book the material/goods for his trucks whey they are idle at certain location or some point, then he can search for the feasible loads from location to location. In this aspect also Transporter can utilize this Application for his bookings.

The screenshot shows the homepage of the 'Trucker' application. At the top, there are navigation links for 'FIND SHIPMENTS', 'LOGIN', 'ATTACH A TRUCK', 'POST REQUIREMENT', 'TRACK ORDER', and 'GET SUPPORT'. Below the header, there are two tabs: 'For Personal Use' (selected) and 'For Companies'. The main title 'Truck Booking Made Easy' is displayed prominently. Below it, a search bar shows 'Find Truck to transport from Vishakapatnam' to 'Kurnool'. There are four search filters: 'TRUCK TYPE' (12 Tyre), 'FOR MATERIAL' (Steam Coal), 'QUANTITY' (15 Tons), and 'DELIVERY BY' (23 Apr). A red 'SEARCH' button is located to the right of these filters. Below the filters, a recent search history is listed: '12 Tyre Truck for Steam Coal by 16 Apr', 'DCM for 1 Ton of Steel by 01 Apr', and '10 Tyre Truck for Cobalt by 30 Mar'. The main content area features sections for 'Available Now' (with a red dot icon) and 'Trucks by category'. The 'Available Now' section displays five truck listings with details like capacity (15 Tons, 20 Tons, 18 Tons), delivery range (22 KM Away, 20 KM Away, 10 KM Away), company names (Bathina Transport, Ashoka Leyland, KL Logistics, Ashoka Leyland, SriKanya Logistics), and ratings (4.5, 4.5, 4.5, 4.5 stars). The 'Trucks by category' section shows small thumbnail images of various truck types.

In the following screen he posts his requirement.

The screenshot shows a search interface for truck booking. At the top, it displays "Find Truck to transport from Vishakapatnam" to "Kurnool". Below this, there are filters for "TRUCK TYPE" (12 Tyre), "FOR MATERIAL" (Steam Coal), "QUANTITY" (15 Tons), and "DELIVERY BY" (23 Apr). A red "SEARCH" button is on the right. Below the filters, a message says "Recent search: 12 Tyre Truck for Steam Coal by 16 Apr DCM for 1 Ton of Steel by 01 Apr 10 Tyre Truck for Cobalt by 30 Mar". The main area shows "Available Now" trucks with details like capacity (15 Tons, 20 Tons, 18 Tons) and location (Vishakapatnam, Andhra Pradesh). There are also sections for "Trucks by category" showing icons of various truck types.

In the following screen, Transporter will add his truck details in single or in Bulk mode so that all his trucks data or information is saved in the APP. So that Transporter can check the availability of trucks and sent trucks to parties. These trucks data keeps updating based on the bookings. So transporter will have flexibility to view all this Trucks status.

The screenshot shows the "Add your Truck Details" form. On the left, a sidebar lists steps: 1. TRUCK DETAILS, 2. ACCOUNT, 3. POINT OF CONTACT. The main form includes fields for "Truck Reg. Number", "Truck Model" (dropdown), "Min. Load" and "Max. Load" (text inputs), and an "Available Now?" switch (set to Yes). Below these is a "Current Truck Location" input with a map icon. A red "SAVE & NEXT" button is at the bottom. To the right, a modal window titled "Enter Truck Location" shows a map of a neighborhood in Lohith Residency, Appalarasaiha Colony, with various landmarks labeled. It includes fields for "Address 1", "Address 2", "Landmark", "City", "State" (dropdown), and "Pincode", with a yellow "CONFIRM" button at the bottom.

TRUCK APP

This is the following screen to the above one to add further more details regarding Trucks.

The screenshot shows a user interface for adding truck details. On the left, a vertical sidebar lists three steps: 1. TRUCK DETAILS (highlighted in red), 2. ACCOUNT, and 3. POINT OF CONTACT. Step 1 has a red arrow pointing to the right. The main area is titled "Add your Truck Details". It contains a table with 5 rows for truck information. Each row includes fields for Truck Reg. Number, Truck Model, Min. Load, Max. Load, Available Now? (with a yellow switch), and Current Truck Location (with a map icon and a delete 'X'). A "SAVE & NEXT" button is at the bottom right.

Truck Reg. Number	Truck Model	Min. Load	Max. Load	Available Now?	Current Truck Location
				<input checked="" type="checkbox"/> Yes	[Map Icon] X
				<input checked="" type="checkbox"/> Yes	[Map Icon] X
				<input checked="" type="checkbox"/> Yes	[Map Icon] X
				<input checked="" type="checkbox"/> Yes	[Map Icon] X

+ ADD NEW ROW

SAVE & NEXT

In the following screen Transporter will register his details so that can continue for further process.

The screenshot shows a registration form overlaid on the previous screen. The title is "Please register with your mobile number". It contains three input fields: "Enter full name", "Enter business name", and a phone number field with the value "+91 9876543210". Below these is a large red "CONTINUE" button. At the bottom, there is a link "Already a member? Login here."

Enter full name

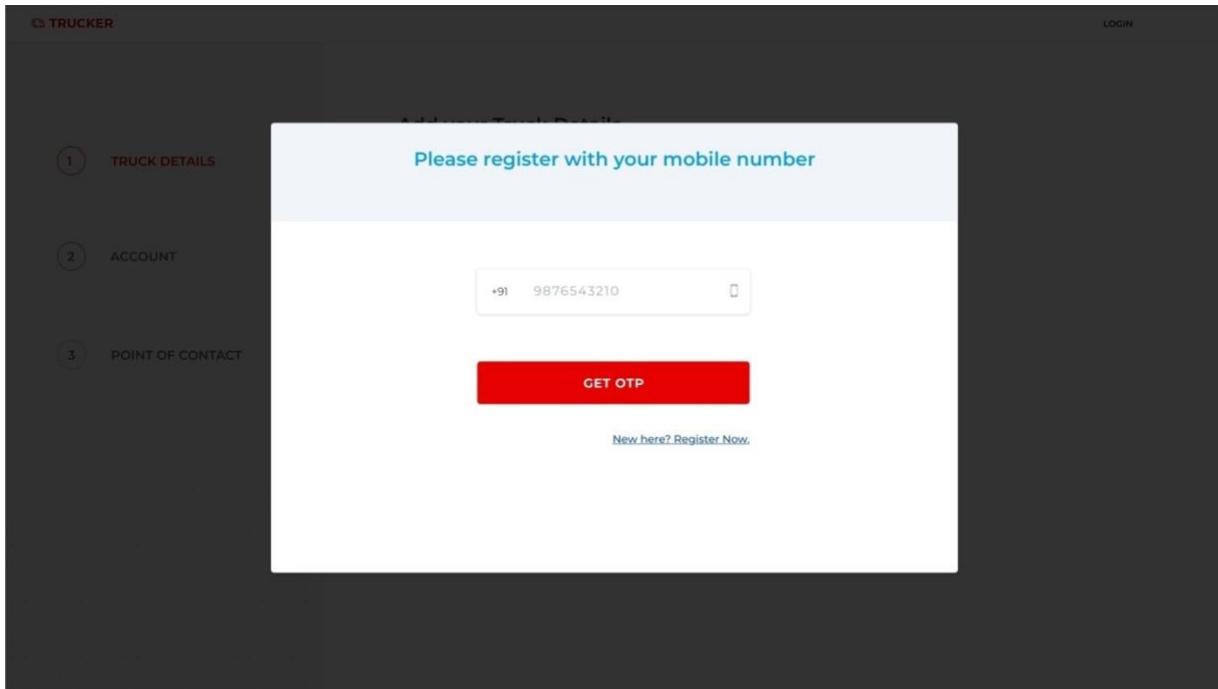

Enter business name

+91 9876543210

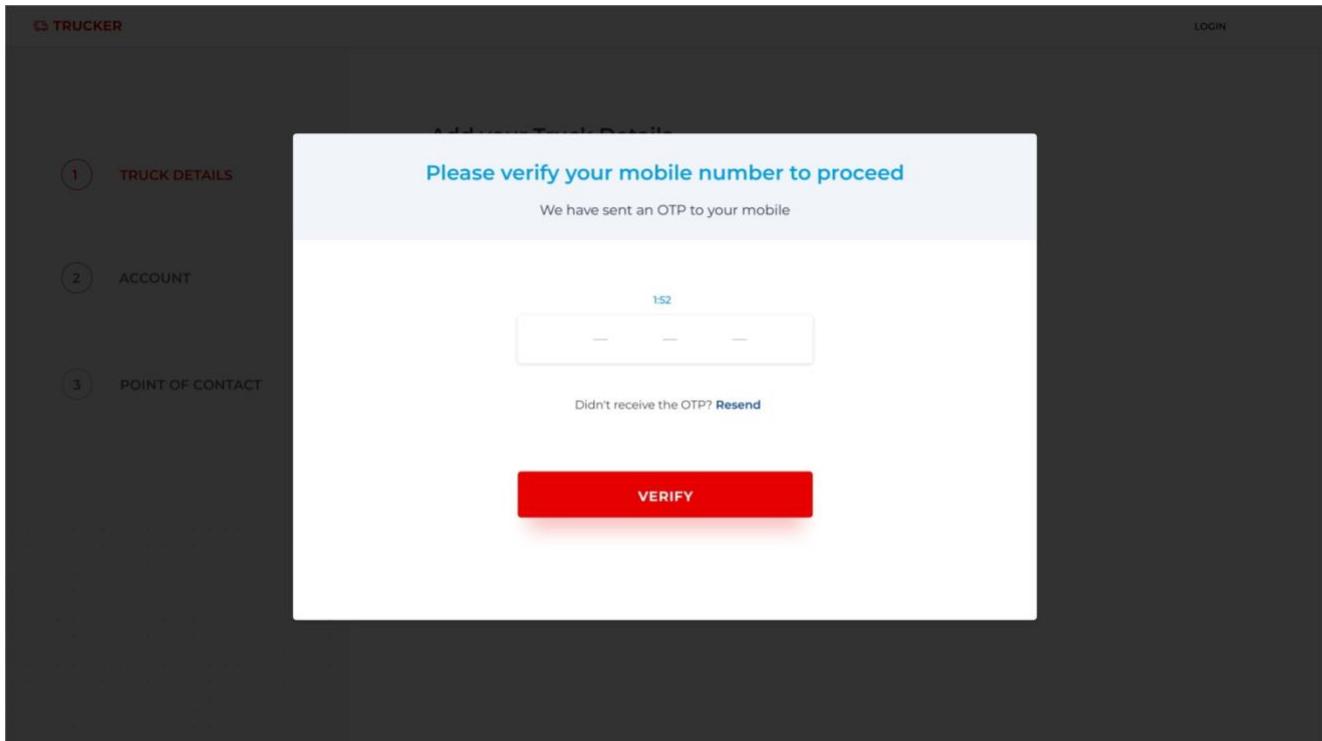

CONTINUE

Already a member? [Login here.](#)

Transporter will enter his mobile number for registration process so that OTP will be generated.

OTP is verified in the following screen

After verification of the OTP, Transporter is allowed to enter the details about his contact details in the following screen.

The screenshot shows the TRUCKER app interface. On the left, there's a vertical sidebar with three items: 'TRUCK DETAILS' (with a green checkmark), 'ACCOUNT' (with a green checkmark), and 'POINT OF CONTACT' (with a red circle containing the number '3'). An arrow points from 'POINT OF CONTACT' to the right content area. The main content area has a header 'Please confirm your point of contact' and a sub-instruction 'Let us know whom we can contact for logistic support'. Below this is a checkbox labeled 'Fill with my details'. There are three input fields: 'Full Name' (containing 'Ramaraju'), 'Phone' (containing '9876543210'), and 'Email' (containing 'ramaraju@company.com'). A red 'SAVE & NEXT' button is at the bottom right.

Transporter will add the details and saves the record as follows

This screenshot shows the same app interface as the previous one, but with different data entered. The 'POINT OF CONTACT' section now contains: 'Full Name' (Ramaraju), 'Phone' (9876543210), and 'Email' (ramaraju@company.com). The 'Fill with my details' checkbox is checked. The red 'SAVE & NEXT' button is visible at the bottom right.

Once after saving the data Transporter gets the following screens.

Your Trucks were added successfully.

The Trip progress for the Transporter will be shown as in the following screen with GPS tracking.

This screenshot shows a trip detail page for a transporter named RAMARAJU. The trip is for Steam Coal from Gajuwaka, Vishakapatnam to Old Bus stand area, Kurnool. The truck number is API16T4576, a 12 Tyre TATA HEAVY DUTY model. The delivery date is 23 Apr via Road. The map shows the route from Hyderabad to Kurnool, indicating a distance of 858 km and a duration of 15 h 19 min. The map also highlights states like Andhra Pradesh and Tamil Nadu. Below the map, there's a section for documents with two entries: LR Document (752KB, uploaded today) and E-Way Bill (1.2MB, uploaded today). The LR Document has download links.

From the Dash board of the Transporter if he clicks on MyTrucks. Then the following screen will be displayed.

It shows all the Trucks which are kept for loading, he can check Trip in progress. Even the Transporter can add new Trucks from the below screen as well.

This screenshot shows the 'My Trucks' section of the TRUCKER app. It lists five trucks, all of which are currently on a trip. Each truck entry includes the truck number (API16T4576), truck type (12 Tyre), truck model (TATA HEAVY DUTY), capacity (15 Tons), current location (Gajuwaka, Vishakapatnam), and a 'Trip in progress' status indicator. The interface includes filters for All Trucks, All Capacities, All Models, and a switch to Show only Idle Trucks. There are also buttons for ADD NEW TRUCK, TRACK ORDER, and GET SUPPORT.

TRUCK APP

When the Transporter clicks on Transactions from the Dashboard menu , the following screen will be displayed so that Transporter will check all the transactions based on date.

The screenshot shows the 'Transactions' section of the TRUCKER app. At the top, there are navigation links: 'My Deliveries', 'My Trucks', 'Transactions' (which is highlighted in red), and 'Reports'. On the right, there are buttons for 'FIND SHIPMENTS', 'TRACK ORDER', and 'GET SUPPORT'. The user is located in 'Vishakapatnam'. Below the header, the URL 'Home > Transactions' is visible. The main area has a search bar with 'Date Range' and 'SEARCH' buttons, and an 'EXPORT' button. A table lists 230 transactions, showing columns for Date, Transaction, Amount, and Status. The transactions are dated from February 2020 to January 2020, with various amounts ranging from ₹ 2,438 to ₹ 26,441 and statuses like PAID, FAILED, PENDING, and CANCELLED.
